- performing records searches as requested by clients;
- maintaining logs on the receipt and shipment of records;
- performing document destruction and archiving;

- performing periodic inventories of records; and
- Performing additional document control tasks as assigned.

**Minimum Education:** Bachelor's Degree from an accredited university or High School Diploma w/additional years of experience or equivalent training.

### **Project Manager I**

**Minimum/General Experience:** Four (4) or more years of experience providing management and technical direction to project personnel. Must be familiar with the principles of regularly exercising independent judgment, as well as a high level of analytic skill, in solving complex technical, administrative, and managerial problems. Must have direct management experience in supporting document conversion operation and possess an understanding of information management technologies including electronic imaging. Provides overall direction for all project level activities.

**Functional Responsibility:** Responsible for project evaluation, definition/goal setting, project planning and identifying/securing appropriate resources, delegating work and managing deliverables, analyzing complex information, developing and presenting recommendations to leadership, sharing information with appropriate internal/external constituents, delivery of improved performance measurement capabilities, the development and management of relationships with cross-functional stakeholders. Overall responsibility for ensuring project implementation and/or support within scope of responsibility, to include activities such as process flow definition, operational readiness support, process documentation, communication, and/or project management.

**Minimum Education:** : Bachelor's Degree at an accredited university

### **Project Manager II**

**Minimum/General Experience:** Seven (7) or more years of specialized experience planning and managing commercial or Government projects. Must be familiar with the principles of regularly exercising independent judgment, as well as a high level of analytic skill, in solving complex technical, administrative, and managerial problems. Must have direct management experience in supporting document conversion operation and possess an understanding of information management technologies including electronic imaging. Provides overall direction for all project level activities.

**Functional Responsibility:** In close consultation with the customer and senior management, ensures the success of the goals and objectives of the project. Is expert in the application of both conventional and leading edge Project Management theories and techniques. Is able to provide the customer with options for managing and controlling the outputs of the project, given the constraints of budget and schedule. Typically leads a team of other managers to solve major problems for the project and to optimize quality. Is an expert in the application of knowledge and skills to meet project requirements. Combines solid grounding in accepted Project Management methodology with experience in both private and Government projects.

**Minimum Education:** Bachelor's Degree from an accredited university.

### **Project Leader II**

**Minimum/General Experience:** Must possess at a minimum 5 years experience in the specified field. Must lead the project or multiple tasks and retains overall responsibility for performance including cost, schedule, deliverables and contractual compliance. Provides the interface to the customer and other project leaders. May work under a Program Manager for multiple projects.

**Functional Responsibility:** Identifies, acquires, and utilizes company resources to achieve project objectives. Establishes priorities, task assignment and completion. Ensures quality and productivity standards are maintained while meeting project/client deadlines and budget constraints. Serves as the client liaison on all project matters. Performs a quality assurance role to ensure timely delivery of all specified deliverables, and compliance with government regulations, codes and GCS policy and procedures. Participates in contract negotiations.

**Minimum Education:** bachelor's degree from an accredited university and at least 5 years of experience in the field or in a related area.

### **Quality Assurance Evaluator**

**Minimum/General Experience:-** Three (3) years experience, of which at least one year must be specialized. Specialized experience includes analysis and design of software applications and quality assurance programs; knowledge of current computing environments; demonstrated ability to formulate specifications for computer programmers to use in coding, testing, and debugging of computer programs; and knowledge of quality assurance methodologies.

**Functional Responsibility:** Provides technical and administrative direction for personnel performing software development tasks, including the review of work products for correctness, adherence to the design concept and to user standards, review of program documentation to assure government standards/requirements are met and ensure progress in accordance with schedules. Coordinates with the Project Manager to ensure problem solution and user satisfaction. Makes recommendations, if needed, for approval of major systems installations. Prepares milestone status reports for colleagues, subordinates, and end user representatives. Produces quality assurance deliverables. May also be required to establish and maintain a process for evaluating software and associated documentation, determining resources required for quality control, and maintaining the level of quality throughout the software life cycle.

**Minimum Education:** Bachelor's Degree from an accredited university or equivalent training and/or experience. Is responsible for all images and index data released to the AGENCY are fully compliant with all specifications. Project requirements dictate that corrective action will not cause unreasonable delay in the delivery schedule without penalty. Accordingly, the QAE will make timely reports when deficiencies are noted.

### **Subject Matter Expert**

**Minimum/ General Experience** - Four (4) years of progressively increasing responsible subject matter experience, in similar work environments. Concentrated hands-on experience in the specific discipline of the subject matter field.

**Functional Responsibilities** - Perform as a consultant in highly specialized subject areas needs assessment and business process. Provide highly technical and/or specialized guidance concerning solutions to complex processing problems related to the subject matter field. Perform analyses and studies; prepare reports and give presentations. Work independently or as a member of a team

**Educational Requirements** - Bachelors degree at an accredited university in appropriate subject matter fields or related discipline.

### **Sr. Subject Matter Expert**

**Minimum/General Experience:** Has five (5) years of progressive experience in the area to be supported.

**Functional Responsibilities:** As an expert in the subject matter field, augments or directs project teams. Provides high level functional and systems analysis, design, integration, documentation, and implementation advice on exceptionally complex studies that require an expert knowledge of the subject matter for effective problem solution. Participates in all phases of study development with emphasis on the planning, analysis, documentation, and presentation phases. Applies higher level principles and methods to exceptionally difficult and narrowly defined technical problems to arrive at automated solutions. Prepares and delivers senior management presentations and briefings as required by the task order.

**Minimum Education:** Possesses a bachelor's and/or master's degree from an accredited university in related technical or scientific discipline related to the task to be supported, or equivalent work experience

### **Senior Consultant**

**Minimum/General Experience:** This position requires a total of seven (6) years experience. Four (4) years will be specialized experience. The remainder may be any combination of specialized and/or general experience.

**Functional Responsibility:** The Senior Consultant works independently or only under very general direction on complex application problems involving all phases of systems analysis to provide resolutions; provides technical and administrative direction for personnel performing software development tasks, including the review of work products for correctness, adherence to the design concept and to user standards, and for progress in accordance with schedules; coordinates with personnel to ensure problem resolution and user satisfaction; makes recommendations, if needed, for approval of major system implementations; prepares milestone status reports and deliveries/presentations on the system concept to colleagues, subordinates, and user

representatives; and provides technical direction to systems analysts who are assigned to assist.

**Minimum Education:** Bachelor's Degree from an accredited university in a field applicable to this position.

### **Programmer Analyst I**

**Minimum/General Experience:** Less than 3 years of experience in life cycle systems analysis and development.

**Functional Responsibilities:** Participates in/supports the analysis and definition of functional system requirements, including development of decomposition diagrams. Responsible for software design and translating specifications into code through reuse/reengineering, Supports operational system demonstrations and user training sessions.

**Minimum Education:** bachelor's degree at an accredited university and at least 2 years of experience in the field or in a related area.

### **Database Analyst**

**Minimum/General Experience:** Two to four years (2-4) of progressive experience in systems analysis/programming. One year in application design using various database management systems. One year experience supporting multiple imaging systems with a thorough understanding of the database structures of various imaging systems. Must be able to evaluate and recommend available DBMS products to meet user requirements. Must be able to determine file organization, indexing methods, and security procedures for specific user application.

**Functional Responsibility:** Evaluates and recommends available DBMS products to meet users requirements. Determines file organization, indexing methods, and security procedures for specific user application. Train Database Specialists I and II in supporting specific systems and applications. Perform troubleshooting and problem resolutions. Develop and implement database redundancy and data recovery routines.

**Minimum Education:** Bachelor's Degree in Computer Science at an accredited university or equivalent training and/or experience

### **Computer Systems Analyst IV**

**Minimum/General Experience:** Three (3) years experience in supervising personnel operating computer systems, including one year experience as shift supervisor or manager in a multi-shift environment. Must have a thorough knowledge of the capabilities of applicable computer hardware and software configurations.

**Functional Responsibility:** Supervises all personnel engaged in the operations and support of the computer systems and peripheral equipment in large scale or multi-shift operations. May also supervise complex operations which involve two or more additional functions such as network operations, systems software support, production support activities, data conversion, imaging, data entry or tape library activities. Identifies

processing requirements and schedules job streams for computer runs. Responsible for the security and routing of input and output data, problem isolation and restart/recovery.

**Minimum Education:** Bachelor's Degree in Computer Science at an accredited university or equivalent training and/or experience

### **Scanner Operator**

**Minimum/General Experience:** Minimum 1 year experience. Work experience in the operation of office equipment. Must have good work habits with the ability to follow established guidelines and consistently produce high volumes of quality work. Operators must successfully complete a training program on Scanner operation and maintenance.

**Functional Responsibility:** Position requires the operation of high-speed scanner to perform imaging or microfilming. Scanning and microfilming must be carried out according with established, written procedures. Operators must become thoroughly familiar with document preparation procedures. Operators are required to perform daily, weekly, and monthly maintenance routines including minor repair service on Scanners. Operators are expected to meet daily production goals and quality standards. Operators must have an eye for detail and be meticulous in task performance. Operators are required to accurately maintain daily production logs.

**Minimum Education:** High School Diploma or equivalent training and/or experience.

### **Imaging Technician I**

**Minimum/General Experience:** - 1 years of experience in the field or in the related area.

**Functional Responsibility** - The Imaging Technician I is responsible for the scanning department, including equipment and supplies. The document scanner will ensure that the following goals of the department are met:

- Scanning, binding and quality control of documents
- Preparing documents for download, email or burning to CD
- Prioritizing requests from internal customers and ensuring timely completion of requests
- Maintenance and upkeep of computer systems, hardware, software and databases in the department
- Maintain and develop strong relationships with the systems support vendors

**Minimum Education:** - High School Diploma/GED or equivalent Training .

### **Computer Support Technician III**

**Minimum/General Experience:** - Four to Six (4 -6) years of experience in the field or in a related area.

**Functional Responsibility:** Sets up, configures, and supports internal and/or external

networks. Develops and maintains all systems, applications, security, and network configurations. Troubleshoots computers performance issues and creates and maintains a disaster recovery plan. Recommends upgrades, patches, and new applications and equipment. Provides technical support and guidance to users. Familiar with a variety of the field's concepts, practices, and procedures. Relies on extensive experience and judgment to plan and accomplish goals. Performs a variety of tasks. May provide consultation on complex projects and is considered to be the top level contributor/specialist. Typically reports to a manager or head of a unit/department.

**Minimum Education:** - Bachelor's Degree at an accredited university or equivalent training and/or experience.

### **Network Administrator**

**Minimum/General Experience:** - Four to Seven (4-7) years of experience in the related field. At least three years in network configuration management, quality assurance, or project management.

**Functional Responsibility:** Manage network Configuration Management efforts for project implementation, tracking, and maintenance; provide configuration management or quality assurance support for product development efforts; provide management for complex bandwidth issues and reliability with business and functional requirements and mandates; provide quality assurance and quality control

**Minimum Education:** - Bachelor's Degree at an accredited university or equivalent training and/or experience.

### **Network Engineer**

**Minimum/General Experience:** - Four to Six (4 -6) years of experience in the field or in a related area.

**Functional Responsibility:** Sets up, configures, and supports internal and/or external networks. Develops and maintains all systems, applications, security, and network configurations. Troubleshoots network performance issues and creates and maintains a disaster recovery plan. Recommends upgrades, patches, and new applications and equipment. Provides technical support and guidance to users. Familiar with a variety of the field's concepts, practices, and procedures. Relies on extensive experience and judgment to plan and accomplish goals. Performs a variety of tasks. May provide consultation on complex projects and is considered to be the top level contributor/specialist. Typically reports to a manager or head of a unit/department.

**Minimum Education:** - Bachelor's Degree at an accredited university or equivalent training and/or experience.

### **General Clerk I\***

**Minimum Experience** – None required
